INTRODUCTION

Technical and Vocational Education and Training (TVET) in polytechnics began with the establishment of the first polytechnic, Ungku Omar Polytechnic, in 1969. To date, 36 polytechnics and 106 community colleges have been established throughout the country, in line with the rapid development of the industrial sector's demand for skilled manpower. Polytechnics and community colleges play an important role in providing access to quality higher education and recognized TVET-based study programmes, producing holistic graduates with entrepreneurial skills and balanced characteristics while leveraging smart partnerships with various stakeholders. Graduates from TVET programmes at polytechnics and community colleges are highly sought after in the job market. The study programmes offered at polytechnics and community colleges include engineering, technology, commerce and services at certificate, diploma, and bachelor's degree levels. Polytechnic and community college graduates are equipped to meet workforce demands while supporting the development of knowledgeable and skilled human capital. This aligns with the role of polytechnics and community colleges as some of the largest providers of TVET-trained workers in the country. In line with the Malaysia Madani concept, polytechnics serve as a catalyst, particularly in addressing three of its six important pillars: sustainability, well-being, and creativity, through TVET empowerment. Polytechnics emphasize competitiveness and sustainability by fostering a culture of resilience and excellence, as well as creating a dynamic and up-to-date learning ecosystem. These efforts are crucial in ensuring that TVET education in this country remains competitive. This 2024 Information Book serves as reference to POLYCC citizens and stakeholders providing annual statistics on Polytechnics and Community Colleges in Malaysia. This book includes several sections, namely, Departments, Institutions, Students, Programmes, Staff, Industry, and Research and Innovation.
